TITO REINALDO

OutSystems Solution Architecture and Technical Leadership

Lisbon, Portugal | EU passport | +351 925 617 628 | titoreinaldo@gmail.com

PROFILE

OutSystems technical lead specialising in solution architecture, REST integrations and hands-on delivery, with OutSystems experience since 2020. Works with O11 and ODC and has delivered production AI assistants. Led teams of 2-7 engineers across financial services, life sciences, energy and automotive, translating business requirements into application designs and coordinating delivery with stakeholders.

CORE SKILLS

Platforms OutSystems Developer Cloud (ODC) and OutSystems 11 (O11); Reactive Web, Traditional Web and Mobile.

Architecture Solution design, REST APIs, SQL and data modelling, reusable components, access controls, caching and asynchronous processing.

AI development OutSystems Mentor in ODC; AI-assisted development using the OutSystems 11 MCP server (Model Context Protocol); AI and LLM integration.

Leadership and delivery Code reviews, technical guidance, stakeholder engagement, Kanban, Jira and Azure DevOps.

PROFESSIONAL EXPERIENCE

Lead Software Engineer and Tech Lead Apr 2026 - Present

OutSystems | Consulting assignment via iQube / Indigo

- Designed role-based notification architecture with access controls, state management, caching and asynchronous processing.
- Led delivery of the Partner Center AI Assistant, launched in June 2026, coordinating LLM behaviour, integrations, OutSystems development and UX.
- Delivered Nila, an AI assistant for lead scoring and sales preparation, launched in August 2026; owned scoring design, implementation and production deployment.
- Coordinated engineering with product, design and QA, clarifying work intake and ownership through Kanban.

OutSystems Tech Lead and Senior Developer 2023 - Apr 2026

Capgemini Portugal

- Led teams of 2-7 engineers for Arval, Galp and Roche, covering solution architecture, code reviews, implementation and stakeholder coordination.
- Led the rebuild of Roche's OutSystems application integrated with Pega, resolving architecture and implementation gaps in workflows handling sensitive data.
- Refactored Arval's multi-tenant application from Traditional to Reactive Web, including API integrations and multilingual interfaces.
- Developed mobile and web voucher and rewards applications for Galp.

OutSystems Developer and Senior Engineer 2020 - 2023

PwC Portugal

- Built OutSystems applications for payments, tax, direct debit, anti-money laundering and office management.
- Developed Galp user interfaces for applications serving hundreds of thousands of users.
- Implemented REST integrations, SQL business logic, data models and workflows; took on senior delivery responsibilities.

Earlier experience SQL, business intelligence and software development before 2020.
